## EXPERIENCES

**Bits Panindia** - An organisation that provides a well furnished android and web applications to their client and also have their hands on pan card facility of india. A private company which provide and manages pan card **Jan 2023 - Present**

- I am currently working their and I lead many of its android project, Created their whole UI from scratch and working on api integration
- First app – Matrimonial app (Under Developing) Complete the UI, One developer only
- Second app – Hiring app (80% complete) Completed UI and Working on api integration, Both project are under my vision
- Third app – There main app for B2B market, It contains various feature from their coupon concept to Flight, Hotel, Bus booking system. At start this was done by other developer but as more and more complexity arises due to use of third party api's and data parsing issue I have to jump in middle of my another (B2C) project to this. Solved Architecture problem for data parsing use of view model, one activity other fragment, MVVM.
- Fourth app – There B2C platform for their consumer side that have feature of Flight, Hotel, Bus booking. App was made on MVVM, One Activity other fragment, Dagger hilt, Retrofit and more.
- Use of latest **kotlin concepts like, Coroutines, Dagger hilt, MVVM pattern, Retrofit, Datastore, Co-ordinator layout**

**Morr** - An E-Commerce organisation in Malaysia, which provide service for food delivery and other household needs, like Zomato in india **Jan 2022 – July 2022**

### **SDE Intern**

- Worked on Morr main android application, make bottom navigation bar using navigation components, do revamp of whole morr old UI to latest design, implement **main pages UI** (home, account), Implement banners
- Add shimmer effects, make home rows dynamic by using retrofit, implement **all pages on one Activity**, made full order history flow consist of past and current order also with transaction history all data comes from api's

- Use of **Data binding, kotlin coroutines, Dagger hilt, MVVM, Retrofit, API Integration**
- Also have hands on **Unit testing**

### Era Interfaces

- Training with era interfaces in “ANDROID DEVELOPMENT” , 2 months

## PROJECTS

---

### Android Project

#### *Attender*

- A class attendance management system application for teachers to take attendance in a very simple and efficient way
- Teacher have their credentials, can add their classes and student, can take attendance of any date and many more.
- Use of “JAVA” , firebase and emulators

Git hub link: <https://github.com/Nitro2000/classAttendanceManagement>

### Python Project

#### *Speak Bot*

- A ‘non AI’ Speak Bot with specific features.
- Do Some Function for user (Opening Various Sites , Can Send Mails, Tell about its specification etc) • Tell about date – time , Can Speak Speech for me

## SKILLS

---

### Technical

- Java, kotlin, python
- SQL
- Firebase

### Professional

- Android app developer in kotlin
- Hands on FastAPI
- Knowledge of git, github
- Ability to identify and solve problems

## Offers and letter

---

1. **Maxtra Technologies** = Offer on 1 sep, Joining 5 sep, **Role – Trainee Android Developer**, I do work there a week

2. **Acws** = Offer on 28/07/22, joining immediately, **Role – Android Engineer**, Didn't accept the letter

## Profiles

---

- Leetcode: [https://leetcode.com/rg\\_nitro/](https://leetcode.com/rg_nitro/)
- Git hub: <https://github.com/Nitro2000>
- Codechef 3star, highest rating 1556 , link: [https://www.codechef.com/users/rg\\_nitro12](https://www.codechef.com/users/rg_nitro12)
- Hacker rank profile: [https://www.hackerrank.com/rg\\_nitro](https://www.hackerrank.com/rg_nitro)

## Extra/Co-Curricular Activities

---

- 1<sup>st</sup> in “Andro Code” (Coding Competition by ASME (All year))
- 2<sup>nd</sup> in “Maths Quiz” conducted by Maths Club across whole first year .
- Badminton Player at Badminton team in GLA
